

Submitter: Sarah Griffin

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Hello, my name is Sarah and I have been a resident of Oregon since 2017. I chose to move to Oregon because of their largely progressive mindsets and because portland has been named one of the best national cities to be vegan in! This is a big part of why I am in support on sb 85-1 staying as it is written. Factory farming has long been a contributor to greenhouse gasses, the introduction of novel viruses, cruel animal practices, and long term psychological effects to those who work at them.

Let's keep Oregon a hallmark of the PNW and US by remaining strong in their fervent efforts to reduce contributors to climate change. Let's keep Oregons progressive attitudes by putting our foot down to end the cruel and unsanitary conditions of factory farming. Please keep SB 85-1 as is!
