

Submitter: Eileen Stark

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Factory farms are a serious, well-documented danger to air, soil, and water, and are heinously cruel to animals. We are in a heinous climate crisis: The 11 mega-dairy facilities operating in the state produce more than 37 million pounds of planet-warming methane every year. Don't cave in to corporate Ag. Please support SB 85-1.
