

Submitter: Tamra Burleson

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Although I admire the micro-farming community that produce minuscule quantities of food, I and many others, cannot afford a \$20 specialty chicken. Please do not further increase our cost of food and compound supply chain issues or force me to eat chickens raised out-of-state and shipped in because of these activist restrictions on Oregon agriculture. Support large-scale animal agriculture and our growing population.
