

Submitter: Gail Schiel
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2007

I live in a rural county. All of my neighbors and most of my relatives have guns in their households. For most of my life I have been comfortable around guns. But in recent years with mass shootings happening regularly across the United States where groups of people are gathered I've been concerned about going to places like the county fair for the first time in my life. I know that this bill...

HB2007 Allowing city and county governments to opt to ban concealed weapons on municipal property

will not eliminate mass shootings, but it is a step that we can take to help reduce deaths by guns and give us citizens [peace of mind when we attend such gatherings. Please consider passing this.

The other two bills..

HB2005 banning ghost guns

HB2006 raising the age to 21 to buy a semi-automatic rifle

are further efforts that we can take that will help to reduce the harm from guns being in the wrong hands. Deaths by guns are rising at an alarming rate. Please consider passing these bills.
