Measure: HB2005
To: House Committee On Judiciary

I am writing in support of HB2005. I fear for the lives of my family and community everyday knowing there are people that can easily access undetectable and untraceable firearms. I do not understand how building a firearm without any sort of background check can possibly keep our community safe. If someone wants to own a firearm, they should go through the proper steps and not use a "work-around" to purchase the pieces. I have to ask myself, what are these people hiding? It is hard not to assume the worse if someone is behaving in this way.

Please help to save lives by prohibiting firearms that are untraceable and undetectable and being purchased without any sort of background check. Why would we allow someone who would be denied a firearm through a background check to easily purchase one that is untraceable?

Thank you for taking the time to consider what I have written.
