

Submitter: Ann Rad
On Behalf Of: Pride and Joy Landscapes
Committee: Senate Committee On Energy and Environment
Measure: SB525

As a member of the landscaping contractor community I can attest to being able to efficiently and effectively manage gardens and landscapes without the use of ANY gas power tools. Our team uses only battery and human powered equipment to serve many hundreds of clients and gardens in the Portland metro area. Electric equipment is the future of our world, not just this industry and I urge you to move to empower these necessary and dire changes to our workforce. Thank you.
