

Submitter: Bryen Boes
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2006

How can you say, a person 18-20 years old can vote, make decisions on the countries future direction yet are not trust worthy with certain firearms. There is even talk of wanting the voting age reduced to 16 (Which is crazy). That same person can be drafted into war and sent with any firearm to protect the country from invasion or to protect the interests of the country. If an 18-20 year old cannot be trusted with certain firearms, then the real issue should he addressed (Mental health), not blaming in in animate object. If you genuinely feel 18-20 year old's are not old enough or mature enough to be trusted with certain firearms, then it is outrageous that they would be permitted to vote or to go to war. If people in mental distress followed laws then it is already illegal to commit murder so the problem would be solved already, passing more laws on constitutionally protected rights only takes rights away from law abiding citizens, not criminals nor people in metal distress who don't follow the law already. I ask you now and always, stand for the 2nd Amendment, for American Citizens and the people of Oregon and say no to HB2006 and the rest of the anti-firearm agenda being pushed in this day and age and focus on getting help for the people who need it.... Criminals and people in mental distress.
