

Submitter: Diane Archer

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

Please pass this bill! Leaf blowers are ruining the peaceful nature of our neighborhoods and are bad for our health! No one needs to breathe the exhaust they generate or the dust and pollen they kick up! Asthmatics and people with allergies have to stay inside or wear a mask for HOURS after a leaf blower is used in their vicinity.

The noise pollution is detrimental to humans and animals alike. What ever happened to using brooms and rakes? They are so much better for every living being! Added bonus: A person gets more exercise using them!

Sincerely, A Concerned Citizen who has family with asthma,
Diane Archer
