

Submitter: Susan Barnhart

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

Please support SB 525 which directs the Environmental Quality Commission to adopt standards prohibiting engine exhaust and evaporative emissions from small non road engines. Gas powered leaf blowers need to be banned. We are in a climate crisis and must limit the use of gas! Most people can rake or sweep leaves and if they have a disability and are not able to do that they can use an electric leaf blower or a battery powered leaf blower.
