

Submitter: Alex Pape

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

I believe a firearm without a number on it is no more dangerous than one that has a number. The fact that a person takes parts and puts them together to make a a firearm that functions the same as any other firearm and saves a few bucks doing it puts no one in any more danger than buying a assembled firearm. This bill does nothing to combat violence and makes no one safer.
