

Submitter: Daniel Layne

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

HB 3090

My name is Daniel Layne, and I am opposed to HB 3090. Banning the sale of flavored tobacco products, and nicotine products does not solve the situation at hand. All this does is create an even worse black market for such products. Minor's will continue to get these products from friends, family members and the Internet. While it is crazy to me to ban any and all flavored adult products such as cannabis, alcohol and liquor along with products containing nicotine, that simply does not solve any issues. The state of Oregon needs to focus on much more critical issues, such as homelessness, illicit drug issues and the lack of law enforcement funding that had cause our state to become riddled with crime.

Thank You

Daniel
