

Submitter: Nathan Brown
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

Please stop infringing on the rights of all the law abiding gun owning citizens of your state. Please enforce the laws currently on the books as well as strengthen the systems in place for those laws. I am tired of having my rights taken away from over zealous individuals who have no factual clues as to their positions. I am tired of our government siding with mentioned individuals and throwing their duties and constituents under the bus to further their power grabs and line their pockets. Please use ethical judgment and facts to make laws, feelings should not be the leading factor in your decisions. Prosecute the CRIMINALS and NOT ME!!! I have a right to all I own that has nothing to do with more needless government regulations. FIX the real problems and you will not have to alienate the gun owners of your state. I shouldn't even have to be writing this to our elected officials, it should be common sense and fortified by the oaths you took to protect the constitution and the people's rights you govern.
