

Submitter: Ashwini Srinivasamohan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

I've in Eugene for over two years now, and am proud to call it home. However, there is an obvious threat to human and environmental health: gas powered leaf blowers..

Residents in Eugene are organizing and meeting about following the lead of cities like Portland, D.C., and Seattle to comprehensively phase out gas powered leaf blowers.

I urge you to support the amended version of SB 525 and phase out gas powered leaf blowers. Our neighbors—and our neighborhoods—deserve it!
