

Submitter: D256 C456

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

In opposition of this bill. A 3% cap on our ability to manage our overhead is ridiculous. What about placing a cap on our property taxes to make it the governments fair share of our burden caused by them. The bill is unfair and discriminating against property owners. The only way I would agree to a cap is if the government becomes more accountable and controls the rate of increases on our taxes. We are barely getting by financially and they still want to take more and more of our money from us. Let's place a cap on government spending and make them more accountable for every penny they spend.
