

Submitter: Lauren Deming

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

My name is Lauren Deming and I live in Portland. I support SB525 because it creates a path to eliminating the small gas-powered engines that pollute our air, endanger our hearing, chase wildlife from our neighborhoods and generally decrease our quality of life while harming those who are using them. SB525 also provides for relief for businesses which need to change their equipment, so really we all benefit. Please support SB525.
