

Submitter: Peter Andrews

On Behalf Of:

Committee: House Committee On Economic Development and Small Business

Measure: HB3250

As an Oregonian, father of a 9- and 7-year-old and broker/manager of commercial real estate in the Greater Portland Area, I strongly support HB 3250. Oregon is a special place and the power of sports to bring people together, from across the globe to just around the block creates community, inclusion and provides opportunities for so many communities that want and need the right type of economic development. As a father of two young children who love sports, I see how it changes their lives by introducing them to new friends, experiences and many from diverse backgrounds and places. As someone who works to foster and create strong local communities through building, owning and operating commercial real estate I truly believe that this can and should create opportunities for our rural and urban areas to thrive as we rebuild our economy and our reputation as a region and State. I encourage you to support the bill and wholeheartedly believe that together we can imagine a new better Oregon. This is one small, but important step in that direction.
