

Submitter: Walter Shelton
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

As I understand it, the fur sale/trade is for non-essential, needless goods so it is, by definition, unnecessary and should be avoided. It is cruel and inhumane. Animals are not here for humans. Humans are here with other animals and clearly our higher brain functions assign humans the job of managing the planet and animals living on Earth so that all animal life is made as humane - efficient, positive, enjoyable - as possible. Treating other animals of no serious threat/harm, and instead are often advantageous, cruelty is nonsensical and robs us of our human dignity and worth. Vote yes on HB 3390. For me, for yourself, and specifically for kind and innocent animals we live with. Thank you, Walter Shelton
