

Submitter: Megan Carter

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

As an Employee of a smoke shop I oppose this bill. The sales to minors would significantly decrease if we only sold these products in 21+ establishments. I work for a 21+ smoke shop in Albany oregon, we check ids at entry of the establishment and at the purchase. We Id and scan all IDs with our system no matter how old customers appear. This ban on flavored tobacco will create poverty, lose the state a significant amount of money in an already inflated market, and cause an unsafe black market for these products. Please do not pass this bill, not only for my family and coworkers but for your community.
