

Submitter: Jennifer Towers

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2007

It's ridiculous to think that you think a criminal won't hurt someone at, let's say, the zoo. It has no district or hood that they choose to target people. It's all over the city thanks to things that have been passed, and now we have fewer police to help patrol. Education in gun ownership and maybe even better background testing or psychological testing would be better. But don't limit the "AREAS" people can protect themselves and their families. Thanks to the open borders, what 3+ million people have come into our country and don't play stupid and act like you don't know who or why they are here. And stop being sellouts and being bought. Remember why you wanted to be elected for the position you have and remember who put you there and who pays your salary. Be on the correct side of history for once in the past 40 years for a change in Oregon. Stop letting them destroy our state! It burned for two years now there's filth everywhere. Start focusing on the things that are urgent and matter. Common sense, please!
