Measure: HB3086

I am writing in Support of HB 3086

Finally a step in the right direction for Oregon Fish and Wildlife. With a redistribution of commissioners that better know and want what's right for Oregon. Regional representation for conservation, people that spend the money and want what's better for our wildlife.

The river basin management areas would give the Commission better geographical representation from around the state, making it a better model for wildlife management.

Please make this happen!
