

Submitter: Beverly Sherrill

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support the full factory farm moratorium SB 85 -1 as originally proposed. This is a common sense solution to protect our small farms, environment, and communities from factory farms. Only one version of this bill can pass out of the state senate committee and that is SB 85-1 because it truly protects our small farms, environment and communities from factory farms.
