

Submitter: Jessica Harrison

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I Jessica Harrison believe that we should take better care of our animals, our health, and put in mind the pollution and put costs out of the doorway. Within reason. Two years for helping chickens within that time is not enough we need to be able to help put monetary value into pollution bills, and toxins, that affect human beings and animals. There was after all, a tornado in la, and in oregon this is this is the the third time of snow, which is unprecedended in oregon to experience, with even now very low amounts of rain.

Remember this is for our children, we our on the brink of devastating bad wheather, and you want to not pass the the original bill! I say pass the original, it was well worth writing, it up, you believed in this bill, oregon voters do to.
