

Submitter: Thomas Gonsolin Jr
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

The precedent for manufacturing and assembling firearms from parts was established long ago during the first years of our republic and has continued to the present day. I know many people who have built ar-15 style sporting rifles from incomplete receivers and every one of these people are responsible and law abiding. Passing this bill and establishing it as law will instantly turn these people into criminals. House Bill 2005 is clearly infringes upon many law-abiding folks Second Amendment right to bear arms.
