

Submitter: Carol Morgan

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB2948

I am in support of this measure. After a very scary evacuation situation in 2020 due to the Beachie Creek fire, I became very aware of the critical need for emergency locations for evacuating livestock. I was lucky to find space at a private barn for my two horses, but it was a very stressful situation as I explored various resources to find a spot for my animals. Fairgrounds are typically already set up with stalls, holding pens, water spigots, etc and can be a good fit for livestock evacuation needs.
