

Submitter: Teresa Hill
On Behalf Of: Oregon citizens
Committee: House Committee On Education
Measure: HB2895

I support HB 2895 because it will give students the school support they deserve. As a speech-language pathologist working in schools, I see resources and teams dwindle as we are told funding has been depleted. Students needs are extremely high and schools are operating in much, much less than ideal situations when the demands in special education are extreme. Please pass this bill to give students the education they need and to improve their futures as citizens of Oregon.
