

Submitter: Nathan Leete
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

This country has a rich tradition in which individuals have manufactured their own firearms. This bill will only serve to make law abiding citizens felons, and not address the current increase in crime we are facing. The state should focus on enforcing the current laws on the books before worrying about passing new ones. Not to mention this is unconstitutional under both Oregon and Federal constitutions, and will easily be struck down in the courts in light of the recent New York State Rifle & Pistol Association, Inc. v. Bruen ruling.
