

Submitter: Kevin Guy

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3464

To whom it may concern:

Beavers in our area are a nuisance causing us plenty of problems. Preventing irrigation water to freely flow throughout the system with their unnecessary dams. This can change the water level to be too high or low depending which side of the dam you are irrigating from. Nursery stock grown for commercial sales can also be damaged by these rodents. Changing the classification of beavers away from a rodent will damage many aspects of our agricultural community.
