

Submitter: c louis butts

On Behalf Of: myself

Committee: Senate Committee On Housing and Development

Measure: SB611

i live on a very fixed income,have health issues...my income covers just my rent,most of my utility,leaves barely ough to fill out the shortfall of my food&medical&medications...these last two months've been another time in the last 3 years i've found myself behind on my utility bill,short on my food cost to call for @ least 2 free food services to assist me in getting enough nutrition to keep my health good as it is...thank our community for Meals On Wheels & UpLift...my rent was just raised,might've helped the landlord co. to compensate for inflation,but i just lost not only the OR Covid SNAP assistance,also got \$2 taken out of my SNAP benefits...now that means that since it takes @ least &400/month for me to get reasonable food nutrition to keep me healthy enough to not be hospitalized for malnutrition¬ have to rely on Meals On Wheels&/or UpLift...so if i'm just making rent now along w/paying my utilities,...then medical bills,food become hard-pressed choices to make each month w/what actual monies're left,if any...
so succintly put i whole heartedly Support Rent Caps!!!
