

Submitter: CAROLYN BERNING

On Behalf Of:

Committee: House Committee On Education

Measure: HB2895

Please support ALL of our students by lifting the cap on monies distributed to special education. Our school has experienced a lot of gun violence. These instances mainly affected our students who qualified for special education AND are/were students of color. Students are not getting the help that they so greatly need in order to finish high school and move onto a successful life post senior year. We need to respect our special education teachers and our students receiving services. We need to remove the cap so that these programs can be properly funded. This will directly affect the future of our students. Please do the right thing in supporting this bill.

Thank you for your time.
