

Submitter: Rachel Schiff  
On Behalf Of:  
Committee: House Committee On Education  
Measure: HB2895

I am a speech-language pathologist working in bilingual elementary schools in Portland Oregon. I support this measure because it would enable my students to receive the high-quality communication intervention they need to succeed in school and communicate at home. These services contribute to student capacitation, mental health and job-force readiness. I'm stretched thin between 2-3 schools each year and my students suffer for it.
