

Submitter: Bayard Johnson

On Behalf Of:

Committee: House Committee On Higher Education

Measure: HB2265

I am writing in favor of house bills 2263 and 2265.

It is vital to our communities to increase access to higher education and use studies understand how we can best do this. In this day and age, a high school diploma is not enough to get you a job with a livable wage and more and more companies are requiring a college education to be even considered for a job. In my opinion, it is the job of the elected government to create opportunities for higher education and I look forward to these bills being passed.
