

Submitter: Linda Robinson

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB768

Do Not Pass This Bill. Oregon schools need to teach basic educational skills: reading, writing, math, true history, civics....and not collect any more personal student data. Any time, effort, money, etc. should not be spent on more student data collection. Time, effort, money should be spent on police security in the schools to STOP violence, gang activity and safety AND only basic educational courses....not gender affirming, etc.

I oppose this bill.
