

Submitter: Christopher Douglass

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2007

As a 5th generation Oregonian and US Navy veteran who was introduced to firearms in the Boy Scouts of America on my way to earning my Eagle Scout rank - this poorly aimed and written legislation is DEFINITELY not part of any solution! It is a solution looking for a problem! The problem is a small, ill informed population of citizens that do not currently own any firearms themselves, who falsely believe they would be safer if no one possessed firearms.

As a DPSST trained and licensed Executive Manager certified professional, I also find this bill to be a solution looking for a problem. I see and hear little evidence that this is an issue worthy of legislation.

Kill this bill!
