

Submitter: Jeff Griffin

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB949

We support this bill. Untreated stormwater sediment from a large area of municipal streets and the state highway discharges directly into the Port's marina boat basin. Unless dredged, it will break apart docks and preclude boater access into slips. The Port ends up addressing the issue by obtaining state and federal permits, testing sediments for proper disposal, and contracting for dredging services. This is an expensive and time consuming process.
