Measure: HB2005

I am adamantly opposed to HB 2005. This measure uses the emotionally-laden catch phrase of "undetectable" to scare people. The proposed goal of the measure is to protect public, but instead of focusing on the actual criminal, it targets the law-abiding, legally-owning and obtaining citizens who choose to have guns. Gun ownership and acquisition is protected under the 2nd Amendment to the Constitution. This right and freedom is targeted by HB 2005. NO!!
