

Submitter: steven schooler

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

Rent increases must be regulated by law or landlords and companies that own properties will hike rent increases too much. Let's not force people out of their homes and increase homelessness. Let not make struggling low income people struggle even more. These already more than profitable well off people and companies don't care about poor people. They only want to fill their pockets with more money regardless of who they hurt. This must stop by putting laws in place without loopholes that they can get around with their expensive lawyers that the rest of us can't afford. Put some teeth into this please!!!!
