

Submitter: John Csaftis

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

At what point do you people think you can run rampant over people who have worked their asses off all of their lives to have an income in their old age to supplement Social Security by purchasing or building a rental building thereby helping our atrocious housing shortage? My wife and I are in our late 70's, never ripped off anyone and you and your cohorts are telling us how much of a cost of living we should be able to charge?? If were younger we would not stay in this beautiful state we love so much for one more damn minute the way you treat us, and that shows from the top of your socialist Democrat Party in Salem to the "acting" incompetent president in the White House. If this power drunk crap continues, We will take down the wall between our duplex, make a single family dwelling, sell it for a profit and get the hell out of Oregon forever and we won't be the only ones who have had up to here with you folks who are always on the side of the renter and who consider their landlords an enemy of the state.

John and Connie Csaftis
