

Submitter: Evan Lavery
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

Since the measure clearly does not ban the use of animal products given its exception for hides I see little point in attempting to ban its use for other purposes. This also does not address that many animals that have their "fur" used are a by product of sporting or agricultural users thus your bill only creates waste. If this is a primarily focused on "fur" clothing then limit its scope to that purpose or be more specific in the type of fur since most would not be used in such a manner (ex: deer fur coats). Although I am sure this bills sponsors feel like they are noble in their efforts it is just more unnecessary legislation and foolish.
