

Submitter: Michael Chan
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

I am not an Oregon resident, but conduct business with several Oregon businesses engaged in wholesale that sell some fur products. I oppose this legislation because it does not include fly tying and fishing with fur products as an exception. most (if not all) of the sources of fly tying fur are not Oregon, so it will only prohibit Oregon businesses from selling fur and reduce tax revenue. No Oregon creatures will be saved. fur products have been used for fly fishing for over 1000 years. there is no documented adverse health effects from its use. and claim is simply conjecture and law by conjecture is poor law.
