

Submitter: Paul Fenley

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

The State of Oregon, in general, needs additional housing. Your work should be focused on this issue. Focusing your time and efforts on any issue that does not promote further housing development planning, including how best to attract developers in multi-family and single-family housing is irresponsible, inept, and ignorant to helping the real needs of tenants in this State. So, at this time, you get to choose to be narrow-minded and continue down the path of destruction you're currently on, or...?
