

Submitter: Linda Bernhardt
On Behalf Of: Shady Grove Farm
Committee: House Committee On Judiciary
Measure: HB3390

The undersigned support this bill for the following reasons:

- Millions of animals are cruelly raised and killed every year for products that have synthetic alternatives products like coats and hats.
- On fur farms, undomesticated animals spend their entire lives in cramped cages and deprived of their natural behaviors. Anal electrocution is a common method of killing these animals, and we have witnessed the slow and horrific death these animals experience.
- It has been proven that animals on fur farms are capable of passing viruses along to humans, such as the coronavirus. We can avoid another pandemic.

Thank you,
Lin Bernhardt
