

Submitter: Craig Dermer  
On Behalf Of: Oregon Citizens  
Committee: House Committee On Education  
Measure: HB2895

I am writing to encourage lawmakers to pass house bill 2895 which would lift the 11% cap on special education funding in Oregon. Students with special needs would benefit greatly from increased funding that could provide schools across the state with more trained staff, resources and professional development opportunities. General Education students also stand to benefit from approving this in that schools would better be able to meet the needs of ALL students with the increased funding. Please show your support for making Oregon schools better by voting in favor of this bill.
