

Submitter: Owen Forrester

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

This is peoples livelihood! They work hard to get furs to make money to support there families and needs. It is also great management for wildlife. We have a deer and elk population problem because of predators. It keeps the farmers from loosing livestock and lowering stress levels of a animal that is pregnant or birthing. I hope people can do true research to see its not just killing animals. There is many good reasons why it happens and needs to continue to happen.
