

Submitter: Nick Bright

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

This is a prime example of the government interfering with the people where they should be left alone. The sale and trade of furs had been going on since the beginning of time and now Oregon lawmakers think that it is time for it to end. This is ridiculous to think that local governments have gotten so twisted around from what they were set in place for that they are trying to micro manage every thing one can do or think to do
