

Opposition to SB 348

I not only oppose SB 348 but am offended by the methods to enact it.

1. Measure 114 squeaked by with a very slim majority. This IN NO WAY demonstrates a mandate and absolutely does not warrant an emergency clause to implement a replacement bill.
2. SB 348 (as well as Measure 114) will have no real effect on gun violence. It will only allow supporters to feel they have done something to address gun violence.
3. With all the recent talk of inclusion and equity, SB 348 will more severely impact compromised individuals. Where is all the sensitivity?

We should enforce the laws we already have. Arrest people who are unqualified to purchase but try to do so anyway. Lock up violent people.

I contend that a society armed with responsible gun owners is safer than one with the restrictions you are trying to impose. People intending to do harm aren't going to be impacted in the least by your rules.
