Committee: House Committee On Judiciary
Measure: HB3390

I oppose HB3390. This bill will ultimately lead to the destruction of the North American Model of Wildlife Conservation. Economic value must be placed on wildlife to generate tax dollars for management.

Our wildlife management model dictates harvesting the surplus each year. This surplus will be lost whether they are harvested or not. Chances are, if these surpluses are not harvested and utilized by fur trappers/hunters, they will still be removed by the state or private companies and not utilized.
