

Submitter: Jesse Cadd  
On Behalf Of:  
Committee: Senate Committee On Judiciary  
Measure: SB348

SB348 is a desperate attempt to circumvent the judicial process which will certainly invalidate Measure 114. The "enhancements" being proposed will just increase the worst aspects of the measure and will just end up back in court only to be overturned as they are all clearly unconstitutional. Meanwhile, honest gun owners will be left in limbo land once again not knowing what they are "legally" permitted to do with regards to magazines, and you will have retro-actively criminalized legal activities for those who have purchased large magazines since December 2022. The new fees were already going to penalize the poor and infringe on their right to bear arms, but now this has been increased yet again. Requiring a "permit" for our right to purchase arms is clearly government overreach. This bill should not proceed any further. Let the courts work out the validity of Measure 114. Thank you.
