

Submitter: Steven Newman  
On Behalf Of: Reasonable People  
Committee: House Committee On Judiciary  
Measure: HB3390

This affects me most when it comes to tying my own flies but I'm sure there's other reasons for it to not pass. Fur from rabbits and squirrels are best and more environmentally friendly than synthetics. Synthetics won't break down and end up leaving more trash in our rivers. This is only going to result in even more pollution in this state.
