

Submitter: Jeff Sagen

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

This bill will effect all trappers across the country. Trapping is a way to keep all predators and nest raiders in check. In doing so effects all other birds and small animals across the United States. Fur is also a environmentally friendly and a biodegradable green product that is renewable. I believe this bill needs to be looked at a lot harder to find the negative side. Please rethink this bill. Thanks
