

Submitter: Brian Hudspeth  
On Behalf Of:  
Committee: Senate Committee On Judiciary  
Measure: SB348

Committee Members,

Yet once again Oregon law makers are attempting to circumnavigate the legal system. It should be blatantly obvious by now that the individual rights of US citizens are fundamental. The second amendment guarantees the right to keep and bear arms. As a law abiding citizen of the the state, I am constantly appalled by the actions of our lawmakers. let's work on something we can all support, like crime and mental health issues! instead of trying to secure leftist votes by enacting laws that will do NOTHING to protect Oregons citizens. Guns are simply tools, no different than any other tool. In the wrong hands they can cause harm. But instead of dealing with the problem, you seek to take away fundamental rights, granted to every individual under the US Constitution. Of which you all share an oath to defend! So I guess oaths don't mean anything to any of you who seek to push this garbage legislation through our system.

Let's work to together to do good, let's fight crime, mental health, and the myriad of other issues plaguing our society, and quit stripping the rights of law abiding citizens, the very citizens that would act to defend innocence.
